SKILLS

React

Redux

Typescript

Node

Webpack

Unix

HOBBIES

I like to learn unix-like systems, and create the most efficient workflow using such tools like: tiling window managers, terminal emulators, vim-like key bindings etc.

PROFILE

Front-end developer with 3+ years of experience

Participated in various projects of varying complexity, maintaining existing and designing / implementing new functionality. I Consider my main task to be writing such a project architecture that will ensure a quick solution to business tasks while maintaining the scalability and readability of the code

Currently, in the team, I am responsible for the frontend and part of the backend functionality (golang microservice), support and configure aws ec2 instance. I am developing towards the position of full-stack web developer
